EDUCATION

- Bharati Vidyapeeth's College of Engineering, New Delhi (Affiliated to GGSIPU)** Delhi, India
Bachelor of Technology in Electronics and Communication Engineering; CGPA: 8.3 Sept 2023 – June 2027
 - Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Software Engineering

SKILLS SUMMARY

- Languages:** C++, Python, JavaScript
- Frontend:** React.js, Tailwind CSS, Material UI, Bootstrap, HTML5, CSS3
- Backend:** Node.js
- Databases:** MySQL, MongoDB
- Machine Learning:** Scikit-learn, TensorFlow, Pandas, NumPy
- Tools:** Git, GitHub, PowerBI, Excel

EXPERIENCE

- Summer Trainee** Bharati Vidyapeeth's College of Engineering, New Delhi
AI/ML and Deep Learning Summer Training June 2025 – July 2025
 - Machine Learning Fundamentals:** Worked on supervised and unsupervised learning, implemented data preprocessing pipelines, feature engineering, and built classification and regression models.
 - Model Development & Evaluation:** Developed and evaluated machine learning models using NumPy, Pandas, and Scikit-learn, applying accuracy and confusion matrix for validation.

PROJECTS

- MediBook [Live] [GitHub]: (React.js, Node.js, Express.js, MongoDB, Socket.io, Python)**
 - Overview:** Full-stack healthcare platform enabling online doctor appointments and ML-based medical suggestions.
 - Key Features:** Real-time appointment scheduling using Socket.io, patient registration system, and ML-powered quick medical guidance.
 - Impact:** Improved appointment management efficiency and enhanced healthcare accessibility through intelligent automation.
- CareConnect [Live] [GitHub]: (ReactJS, Tailwind CSS, Node.js, MySQL)**
 - Overview:** Web-based system to manage hospital operations including patient records and staff workflows.
 - Key Features:** Patient and staff management, appointment scheduling, department-wise filtering, and secure data handling.
 - Impact:** Built a scalable and user-friendly system to streamline hospital administrative processes.
- Sentiment Analysis [Live] [GitHub]: (Python, Scikit-learn, NLTK, Pandas, NumPy, Matplotlib, Seaborn)**
 - Overview:** Machine learning model to classify tweets as positive or negative.
 - Key Features:** Text preprocessing, TF-IDF vectorization, feature engineering, and Logistic Regression model training.
 - Impact:** Achieved 81% accuracy and established a strong ML baseline for sentiment classification tasks.

ACHIEVEMENTS

- 3rd Position:** Summer Hackathon by IOSC, showcasing problem-solving and technical skills.
- Bvest Technical Fest:** Member of organizing committee, assisting in coordination and event execution.
- LeetCode (200+ Problems Solved):** Practiced Data Structures and Algorithms by solving 200+ problems, improving logical thinking and optimization skills.

SOCIETIES & POSITIONS OF RESPONSIBILITY

- EduMinerva, BVCOE** New Delhi, India
Video Editing Head Nov 2023 – Present
 - Contribution:** Created engaging video content for the society's social media campaigns and academic projects, enhancing visual reach and engagement.
- IOSC (Intel OneApi Students Club), BVCOE** New Delhi, India
Video Editing Head and WebD team member NOV 2023 – Present
 - Contribution:** Worked on web-based projects using React.js and Tailwind CSS, focusing on improving accessibility and responsive UI design. Edited and created videos for society promotions and academic work.
- Odyssey 4.0 (College Magazine), BVCOE** New Delhi, India
Editor JAN 2026 – MAY 2026
 - Contribution:** I worked as an editor for the college magazine, reviewing and refining content for clarity, grammar, and consistency while collaborating with the team to meet publication deadlines.
